MICROBIOLOGY

SKU	Description	Unit price
	1.Fungi	
	Saccharomyces W.M.	
	Penicillium W.M.	
	Aspergillus W.M.	
	Bread mould (show hyphae and spore)W.M.	
	Aspergillus (show hyphae and spore)W.M.	
	Rhizopus stolonifer W.M.	
	Septate hypha W.M.	
	Nonseptate hypha W.M.	
	Actinomycets W.M.	
	spore of Ustilago maydis	
	mucor w.m.	
	saccharomyces cerevisiae	
	2.Bacteria	
	Staphylococcus , Pseudomonas and Spirillum smear	
	3.Coccus	
	Staphylococcus smear	
	Streptococcus faecalis smear	
	Micrococustetragenus smear	
	Sarcina smear	
	Staphylococcus Epidermis idia smear	
	neisseria gonorrhoeae smear(pure culture)	
	neisseria gonorrhoeae smear(pathological specimen)	
	Encephalitis aureus	
	Candida albicans Smear.	
	Streptococcus pyogenes smear	
	Staphylococcus aureus smear	
	Streptococcus sanguinis smear.	
	Azotobacter chroococcum smear(capsule)	
	Streptococcus lactis smear	
	hemolytic streptococcus	
	4.Bacillus	
	Escherichia coli smear	
	Bacillus subtilis smear	
	Bacillus subtilis smear(showing spore)	
	Cryptococcus neoformans	
	Salmonella typhi smear(showing flagella)(silver staining)	
	escherichia coli and Bacillus subtilis mix	
	Proteus smear	
	Aerobacter aerogenes smear	
	Clostridium perfringens W.M.	
	Bacillus anthracis smear	
	Clostridium perfringens smear	
	Shigella sonnei smear	
	Bacillus erysipelatos-suis smear	
	Bac. Thuringiensis smear	
	Salmonella typhi smear	
	Br.obortus smear	

	Pasteurella maltocida smear	
	Listeria monocytogenes smear	
	Mycobacterium tuberculosis smear	
	Corynebacterium diphtheriae smear	
	Clostridium botulinum smear	
	Clostridium tetani smear	
	Pseudomonas aeruginosa smear	
	Bordetella pertussis smear	
	Brucella abortus smear	
	Agrobacterium tumefaciens smear	
	Bacillus cereus smear	
	Proteus vulgaris smear	
	Acetobacter aceti smear	
	Nitrobocter smear	
	phototrophic bacteria smear.	
	Salmonella typhi smear	
	Azotobacter of horsebean root nodule smear	
	Vibrio cholerae	
	Bacillus anthraci	
	yersinia pestis	
	bifidobacterium	
	propionibacterium	
	Lactobacillus botulinum	
	campylobacter jejuni	
	5.Special structure	
	Capsular pneumonia	
	spore	
	flagella(silver staining)(typhia)	
	uniflagellate(pyocyanin)	
	lophotrichous(pyocyanin)	
	6.Spirillar bacterium	
	Leptospira W.M.	
	7.Immunity	
	T-lymphocyte(E rosette assay)	
	microphage W.M.(phagocytosis)	
	macrophage W.M.(phagocytosis)	
	lymphocyte transformation W.M.	
	rocket electrophoresis	
	Unidirectional Diffusion	
	Double Gel Diffusion Test	
	countercurrent electrophoresis	
	8.Others	
	corynebacterium	
	Shigella
